The National Association of Broadcasters (NAB), representing the large radio and television owners, is using its lobbyists, campaign contributions and political influence to have Congress and you, the Federal Communications Commission, consider limiting XM Satellite Radio's ability to provide it's customers with "locally oriented" content, including the new XM Instant Traffic & weather channels. Having introduced a bill in the House of Representatives, HR 4026, which represents another attempt by the National Association of Broadcasters (NAB) to restrict satellite radio from offering innovative and leading edge technology to it's listeners, the NAB, again, shows it's short-sightedness and lack of concern for the public it should serve instead of it's corporate masters. As a citizen I am appalled that the FCC would even consider such a biased and one-way suggestion. This country is built on ingenuity and innovation. Please stop this on-going protectionism NOW. Thank you for your consideration
